Volume Contents

Number 1. January

Starch Synthetase, Phosphorylase, ADPglucose Pyrophosphorylase, and UDPglucose Pyrophosphorylase in Developing Maize Kernels. J. L. Ozbun, J. S. Hawker, E. Greenberg, C. Lammel, Jack Preiss, and E. Y. C. Lee 1

Auxin Inhibition of Ripening in Bartlett Pears. Chaim Frenkel and Raymond Dyck 6

Effect of Light on Ribonucleic Acid Metabolism in Greening Maize Leaves. Eitan Harel and Lawrence Bogorad 10

The Role of ATP in Mechanically Stimulated Rapid Closure of the Venus's Flytrap. M. J. Jaffe 17

Wound-induced Proteinase Inhibitor in Tomato Leaves. Some Effects of Light and Temperature on the Wound Responses. T. R. Green and C. A. Ryan 19

Changes in Certain Aminoacyl Transfer Ribonucleic Acid Synthetase Activities in Developing Pea Roots. Joe E. Cowles and Joe L. Key 22

Ultrastructural Transformations in Bean Inner Mitochondrual Membranes. R. H. Wilson, E. L. Thurston, and R. Mitchell 26

Stomatal Behavior and Water Status of Maize, Sorghum, and Tobacco under Field Conditions. I. At High Soil Water Potential. Neil C. Turner and John E. Begg 31

Far Red and White Light-promoted Utilization of Calcium by Seedlings of *Phaseolus vulgaris* L. Katie Helms and D. J. David 37

Effects of Phosphorus Deficiency on the Photosynthesis and Respiration of Leaves of Sugar Beet. Norman Terry and Albert Ulrich 43

Light and Calcium Interactions in *Chlorella* Inhibited by Sodium Chloride. Phrosene E. Chimiklis and Edward P. Karlander 48

Endosperm Protein of Wheat Seed as a Determinant of Seedling Growth. L. B. Lowe and S. K. Ries 57

The Origin and Turnover of Organelle Membranes in Castor Bean Endosperm. T. Kagawa, J. M. Lord, and Harry Beevers 61

Development of Enzymes in the Cotyledons of Watermelon Seedlings. T. Kagawa, D. I. McGregor, and Harry Beevers 66

Formation of Carbon Monoxide and Bile Pigment in Red and Blue-Green Algae. Robert F. Troxler and Joy M. Dokos 72

Glyceraldehyde 3-Phosphate Dehydrogenases and Glyoxylate Reductase. I. Their Regulation under Continuous Red and Far Red Light in the Cotyledons of *Sinapis alba* L. R. Cerff 76

Action Spectra for Guard Cell Rb^+ Uptake and Stomatal Opening in *Vivia faba*. Theodore C. Hsiao, W. G. Allaway, and L. T. Evans 82

Apple Leaf Senescence: Leaf Disc Compared to Attached Leaf. Patricia W. Spencer and John S. Titus 89

Rapid Growth Inhibition of *Avena* Coleoptile Segments by Abscisic Acid. Marilyn M. Rehm and Morris G. Cline 93

Isolation of Mesophyll Cells from *Sedum telephium* Leaves. I. Rouhani, H. M. Vines, and C. C. Black, Jr. 97

Photosynthetic Production of Hydrogen Peroxide by *Anacystis nidulans*. C. O. Pat Patterson and Jack Myers 104

Effect of Light on Mevalonic Acid Incorporation into the Phytosterols of *Nicotiana tabacum* L. Seedlings. Parshall B. Bush and C. Grunwald 110

Chlorophyll Formation in Greening Bean Leaves during the Early Stages. Paul Mathis and Kenneth Sauer 115

Nitrate Uptake by Dark-grown Corn Seedlings. Some Characteristics of Apparent Induction. W. A. Jackson, Donna Flesher, and R. H. Hageman 120

Some Factors Regulating Auxin Translocation in Intact Bean Seedlings. John Long and Eddie Basler 128

Isolation from *Rhizobium* for Factors Which Transfer Electrons to Soybean Nitrogenase. D. A. Phillips, R. M. Daniel, C. A. Appleby, and H. J. Evans 136

A Reversible Conversion of Phototransformable Protochlorophyll(ide)$_{656}$ to Photoinactive Protochlorophyll(ide)$_{656}$ by Hydrogen Sulfide in Etiolated Bean Leaves. Merrill L. Gassman 139

Hormonal Control of Isoperoxidases in Lentil Embryonic Axis. Thomas Gaspar, Anwar A. Khan, and Danielle Fries 146

Indoleacetic Acid and Abscisic Acid Antagonism. I. On the Phytochrome-mediated Attachment of Mung Bean Root Tips on Glass. T. Tanada 150

Indoleacetic Acid and Abscisic Acid Antagonism. II. On the Phytochrome-mediated Attachment of Barley Root Tips on Glass. T. Tanada 154

The Structure of Plant Cell Walls. I. The Macromolecular Components of the Walls of Suspension-cultured Sycamore Cells with a Detailed Analysis of the Pectic Polysaccharides. Kenneth W. Talmadge, Kenneth Keegstra, Wolfgang D. Bauer, and Peter Albersheim 158

The Structure of Plant Cell Walls. II. The Hemicellulose of the Walls of Suspension-cultured Sycamore Cells. Wolfgang D. Bauer, Kenneth W. Talmadge, Kenneth Keegstra, and Peter Albersteim 174

The Structure of Plant Cell Walls. III. A Model of the Walls of Suspension-cultured Sycamore Cells Based on the Interconnections of the Macromolecular Components. KENNETH KEEGSTRA, KENNETH W. TALMADGE, W. D. BAUER, AND PETER ALBERSHEIM 188
Interactions between Gibberellic Acid, Ethylene, and Abscisic Acid in Control of Amylase Synthesis in Barley Aleurone Layers. JOHN V. JACOBSEN 198
Comparative Immunochemistry of Phytochrome. LEE H. PRATT 203
Immunological Determination of the Relationship between Large and Small Sizes of Phytochrome. SUSAN C. CUNDIFF AND LEE H. PRATT 210
Effect of Hormone Antagonist on the Rooting of Shoot Cuttings. N. P. KEFFORD 214
Abscisic Acid Effect on Root Exudation Related to Increased Permeability to Water. Z. GLINKA 217
Photoperiodism and Enzyme Activity: Balance between Inhibition and Induction of the Crassulacean Acid Metabolism. JEANNE BRULFERT, DANIELE GUERRIER, AND ORLANDO QUIEROZ 220
Correction 223
Instructions for Contributors i
Symbols and Abbreviations iii

Number 2. February

Effects of 2-Butylmalonate, 2-Phenylsuccinate, Benzylmalonate, and *p*-Indobenzylmalonate on the Oxidation of Substrates by Mung Bean Mitochondria. M. L. PHILLIPS AND G. R. WILLIAMS 225
Lipid Transformations in Greening and Senescing Leaf Tissue. D. W. NEWMAN, B. W. ROWELL, AND K. BYRD 229
Activation of Polyphenol Oxidase of Chloroplasts. N. E. TOLBERT 234
Functional and Structural Changes in Senescing *Populus deltoides* (Bartr.) Chloroplasts. RUBÉN HERNÁNDEZ-GIL AND MICHAIL SCHAEDLE 245
Studies on the Control of the Rhythm of Photosynthetic Capacity in Synchronized Cultures of *Euglena gracilis* (Z). WILLIAM G. WALTHER AND LELAND N. EDMUNDS, JR. 250
Appearance of Three Chloroplast Isoenzymes in Dark-grown Pea Plants and Pea Seeds. KYUNG EUN YOON PARK AND LOUISE E. ANDERSON 259
D-Glucose 6-Phosphate Cycloadolase: Inhibition Studies and Aldolase Function. MARY W. LOEWUS AND F. LOEWUS 263
Simultaneous Influx and Efflux of Nitrate during Uptake by Perennial Ryegrass. M. A. MORGAN, R. J. VOLK, AND W. A. JACKSON 267
The Mechanism of Freezing Injury in Xylem of Winter Apple Twigs. H. QUAMME, C. J. WEISER, AND C. STUSHNOFF 273
Compartmental Utilization of Carboxyl-^{14}C-Tripalmitin by Tissue Homogenate of Pine Seeds. TE MAY CHING 278
Polyribosomes Conserved during Desiccation of the Moss *Tortula ruralis* Are Active. J. DEREK BEWLEY 285
Multiphasic Absorption of Glucose and 3-O-Methyl Glucose by Aged Potato Slices. JURI LINASK AND GEORGE G. LATIES 289
A Red-Far Red Reversible Effect on Uptake of Exogenous Indoleacetic Acid in Etiolated Rice Coleoptiles. JOHN E. SHERWIN AND MASAKI FURUYA 295
Alternate Pathways of Glycolate Synthesis in Tobacco and Maize Leaves in Relation to Rates of Photorespiration. ISRAEL ZELITCH 299
Blue Light Interference in the Phytochrome-controlled Germination of the Spores of *Cheilanthes farinosa*. V. RAGHAVAN 306
Effects of Calcium and Kinetin on Growth and Cell Wall Composition of Pea Epicotyls. JAMES F. NANCE 312
Asparate Transcarbamylase Activity in Etiolated Cowpea Hypocotyls Treated with 2,4-Dichlorophenoxyacetic Acid. LOWELL B. JOHNSON, C. L. NIBLETT, AND O. D. SHIVELY 318
Aspartokinase from Wheat Germ. Isolation, Characterization, and Regulation. KWAN F. WONG AND DAVID T. DENNIS 322
Aspartokinase in *Lemna minor* L. Studies on the *in Vivo* and *in Vitro* Regulation of the Enzyme. KWAN F. WONG AND DAVID T. DENNIS 327
In Vivo Assay of Nitrate Reductase in Cotton Leaf Discs. Effect of Oxygen and Ammonium. J. W. RADIN 332
Physiology and Ultrastructure of an Oxygen-resistant *Chlorella* Mutant under Heterotrophic Conditions. WARREN M. PULICH AND C. H. WARD 337
Benzyladenine-induced Movement of ^{14}C-Labeled Photosynthate into Roots of *Vitis vinifera*. WASFY W. SHINDY, W. MARK KLIEWER, AND ROBERT J. WEAVER 345
Characteristics of Nitrate Reduction in a Mutant of the Blue-Green Alga *Agmenellum quadruplicatum*. S. E. STEVENS, JR., AND CHASE VAN BAALEN 350
The Stoichiometry of Respiration-driven Potassium Transport in Corn Mitochondria. BETTY I. KIRK AND J. B. HANSON 357
Alteration in Cell Permeability as a Mechanism of Action of Certain Quinone Pesticides. H. C. SIKKA, J. SAXINA, AND G. ZWEIG 363
Effect of Petiole Anoxia on Phloem Transport in Squash. J. W. SIJ AND C. A. SWANSON 368
Mechanism of Inhibition of Translocation by Localized Chilling. R. T. GIAQUINTA AND D. R. GEIGLR 372
Changes in Respiration, Photosynthesis, Adenosine 5′-Triphosphate, and Total Adenylate Content of Ozonated Pinto Bean Foliage as They Relate to Symptom Expression. EVA J. PELL AND EILEEN BRENNAN 378
Action Spectra for Chromatic Adaptation in *Tolypothrix tenuis*. STEPHEN DIAKOFF AND JOSEPH SCHEIBE 382

Photophosphorylation during Chloroplast Development in Red Kidney Bean. II. Photophosphorylation and Photoreduction appear Concomitantly but Initially Are Uncoupled. CHARLES D. HOWLS AND ARTHUR I. STERN 386
Studies on Auxin Protectors. XI. Inhibition of Peroxidase-catalyzed Oxidation of Glutathione by Auxin Protectors and *o*-Dihydroxphenols. TOM STONIER AND HSIN-MEI YANG 391
Influence of Hydrogen Fluoride Fumigation on the Water Economy of Soybean Plants. B. W. POOVAIAH AND H. H. WIEBE 396
Adenosine Triphosphate Content and Seed Vigor. TE MAY CHING 400
Abolishment of Specific Toxicity of Host-Specific Toxin of *Helminthosporium carbonum* by Electrolytic Reduction. ROSS B. PRINGLE 403
Time of Response of Coleoptiles to Kinetin. A. LIPTAY AND D. DAVIDSON 405
Acetylcholine Inhibition of Phytochrome-mediated Increases in a Flavonoid and in Phenylalanine Ammonia-Lyase Activity of Etiolated Barley Plumules. JAMES A. SAUNDERS AND JERRY W. MCCLURE 407
Possible Errors in Quantitative Determination of Phenylalanine Ammonia-Lyase Activity by Spectrophotometric Methods. A. Erez 409
The Interpretation of Studies on Rapidly Labeled Ribonucleic Acid in Higher Plants. M. JACKSON AND J. INGLE 412
Scanning Electron Microscope Observations of Herbicide Dispersal Using Cathodoluminescence as the Detection Mode. BRUCI Y. ONG, RICHARD H. FALK, AND DAVID E. BAYER 415
Corrections 421

Number 3. March

Anaerobic Nitrite Production by Plant Cells and Tissues: Evidence for Two Nitrate Pools. THOMAS E. FERRARI, OLIN C. YODER, AND PHILIP FILNER 423
Soybean Polyamines. Separation and Characterization of Cadaverine. L. C. WANG AND E. SELKE 432
Ethylene, Light, and Anthocyanin Synthesis. L. E. CRAKER AND P. J. WETHERBEE 436
Photosynthetic Phosphoenolpyruvate Carboxylases. Characteristics of Alloenzymes from Leaves of C_3 and C_4 Plants. IRWIN P. TING AND C. B. OSMOND 439
Multiple Forms of Plant Phosphoenolpyruvate Carboxylase Associated with Different Metabolic Pathways. IRWIN P. TING AND C. B. OSMOND 448
Embryo Development in *Phaseolus vulgaris*. II. Analysis of Selected Inorganic Ions, Ammonia, Organic Acids, Amino Acids, and Sugars in the Endosperm Liquid. JERRY G. SMITH 454
Dark Reversion of Phytochrome in Lettuce Seeds Stored in a Water-saturated Atmosphere. A. I-HSIUNG HSIAO AND WILLIAM VIDAVER 459
Kinetics of Stress Relaxation Properties of Oat Coleoptile Cell Wall after Geotropic Stimulation. J. SHEN-MILLER AND YOSHIO MASUDA 464
Changes in Phospholipid Composition of a Winter Wheat Cultivar during Germination at 2 C and 24 C. IAN A. DE LA ROCHE, C. J. ANDREWS, AND M. KATES 468
Growth, Greening, and Phytochrome in Etiolated *Spirodela* (Lemnaceae). DAN PORATH AND YEHUDA BEN SHAUL 474
Factors Affecting Electrical Impedance of Internodal Stem Sections. DEAN R. EVERT 478
A Comparison of Nitrate Reductase Enzymes from Green Leaves, Scutella, and Roots of Corn (*Zea mays* L.). M. J. DALLING, D. P. HUCKLESBY, AND R. H. HAGEMAN 481
Reduction of Water Permeability in Potato Tuber Slices by Cyanide, Ammonia, 2,4-Dinitrophenol, and Oligomycin and Its Reverse by Adenosine 5′-Triphosphate and Cytidine 5′-Triphosphate. DARREL M. STUART 485
Host-Pathogen Interactions. VI. A Single Plant Protein Efficiently Inhibits Endopolygalacturonases Secreted by *Colletotrichum lindemuthianum and Aspergillus niger*. MINA L. FISHER, ANNE J. ANDERSON, AND PETER ALBERSHEIM 489
β-Cystathionase. *In Vivo* Inactivation by Rhizobitoxine and Role of the Enzyme in Methionine Biosynthesis in Corn Seedlings. JOHN GIOVANELLI, LOWELL D. OWENS, AND S. HARVEY MUDD 492
Effects of Oxygen and Respiratory Inhibitors on Induction and Release of Dormancy in Aerial Tubers of *Begonia envansiana*. Y. ESASHI AND M. NAGAO 504
The Effect of Wilting on Proline Metabolism in Excised Bean Leaves in the Dark. CECIL R. STEWART 508
Studies on the Mechanism of Glycerate 3-Phosphate Synthesis in Tomato and Maize Leaves. J. M. GALMICHE 512
Cholinesterases from Plant Tissues. I. Purification and Characterization of a Cholinesterase from Mung Bean Roots. J. RIOV AND M. J. JAFFE 520
An Extracellular Macromolecular Complex from the Surface of Soybean Suspension Cultures. THOMAS S. MOORE, JR. 529
Protein Metabolism in Leaves and Developing Grains of Rices Differing in Grain Protein Content. CONSUELO M. PEREZ, GLORIA B. CAGAMPANG, BERNARDITA V. ESMAMA, RUTH U. MONSERRATE, AND BIENVENIDO Q. JULIANO 537
Evidence for Two Photoreactions and Possible Involvement of Phytochrome in Light-dependent Stomatal Opening. HELEN M. HABERMANN 543
Effect of Gibberellic Acid and Actinomycin D on the Formation and Distribution of Rough Endoplasmic Reticulum in Barley Aleurone Cells. EUGENE L. VIGIL AND MANFRED RUDDAT 549
Cytokinins in *Rhizopogon roseolus*. Secretion of N-[9-(β-D-Ribofuranosyl-9H)purin-6-ylcarbamoyl]threonine into the Culture Medium. MICHEL LALOUE AND ROSS H. HALL 559

trans-Ribosylzeatin. Its Biosynthesis in *Zea mays* Endosperm and the Mycorrhizal Fungus, *Rhizopogon roseolus*. GEORGE MIURA AND ROSS H. HALL 563
New Photoresponses of Phycomyces. ROBERT M. THORNTON 570
Partial Characterization of C_x Cellulase and Cellobiase from Ripening Tomato Fruits. D. M. PHARR AND D. B. DICKINSON 577
Carotenoid Composition of Spinach Chloroplast Grana and Stroma Lamellae. T. TROSPER AND C. FREEMAN ALLEN 584
Phycomyces. Mechanical Behavior of Stage II and Stage IV. C. NORMAN AHLQUIST AND R. IGOR GAMOW 586
Organic Acid Changes in the Epidermis of *Vicia faba* and Their Implication in Stomatal Movement. J. E. PALLAS, JR., AND B. G. WRIGHT 588
Partial Purification of the NADH-Nitrate Reductase Complex from *Chlorella pyrenoidosa*. ROBERT H. SCHLOEMER AND REGINALD H. GARRETT 591
A Simple Method to Differentiate between α- and β-Amylase. D. E. BILDERBACK 594
Stomatal Penetration by Liquids. JEAN-YVES PARLANGE AND PAUL E. WAGGONER 596
Circadian Rhythms and the Induction of Flowering in *Sinapis alba*. J. M. KINET, G. BERNIER, M. BODSON, AND A. JACQMARD 598

Estimation of Nitrogenase Using a Colorimetric Determination for Ethylene T. A. LaRUE AND W. G. W. KURZ 1074
Malate Dehydrogenases of *Pisum sativum*. Tissue Distribution and Properties of the Particulate Forms. WILLIAM C. ZSCHOCHE AND IRWIN P. TING 1076
Light-induced Ethylene Production in Sorghum. L. E. CRAKER, F. B. ABELES, AND W. SHROPSHIRE, JR. 1082
Quantifying Rhythmic Movements of *Albizzia julibrissin* Pinnules. WILLARD L. KOUKKARI, FRANK HALBERG, AND SELON GORDON 1084
The Role of Phytochrome in an Interaction with Ethylene and Carbon Dioxide in Overcoming Lettuce Seed Thermodormancy. FAYEK B. NEGM, O. E. SMITH, AND JUNJI KUMAMOTO 1089
Effects of Carbon Dioxide on Activity of Apple Mitochondria. MICHAEL R. SHIPWAY AND WILLIAM J. BRAMLAGE 1095
Effects of Potassium Deficiency on the Photosynthesis and Respiration of Leaves of Sugar Beet under Conditions of Low Sodium Supply. NORMAN TERRY AND ALBERT ULRICH 1099
Effects of Gibberellic Acid and Sucrose on the Growth of Oat (*Avena*) Stem Segments. PAUL A. ADAMS, PETER B. KAUFMAN, AND HIROSHI IKUMA 1102
Separation and Ultrastructure of Proplastids from Dark-grown *Euglena* Cells. ILANA OPHIR AND YEHUDA BEN-SHAUL 1109
Development of Photochemical Activity and the Appearance of the High Potential Form of Cytochrome *b*-559 in Greening Barley Seedlings. KNUD W. HENNINGSEN AND N. K. BOARDMAN 1117
Malate Dehydrogenase Isoenzymes in Division Synchronized Cultures of *Euglena*. BARRY DAVIS AND M. J. MERRETT 1127

Separation of Mesophyll Protoplasts and Bundle Sheath Cells from Maize Leaves for Photosynthetic Studies. R. KANAI AND G. E. EDWARDS 1133
Studies on the 70S Ribosomal Content of a Plastid Mutant in *Gossypium hirsutum*. FRANK R. H. KATTERMAN AND JOHN E. ENDRIZZI 1138
Growth of Rice Root-derived Callus Tissue in Suspension Culture. H. B. LIEB, T. B. RAY, AND C. C. STILL 1140
Control of CO_2 Fixation by Cell-free Extracts of *Chlamydomonas reinhardtii*. D. D. DAVIS AND K. D. PATIL 1142
Effects of Water Stress on the Indoleacetic Acid Oxidase Activity in Wheat Leaves. VERNE M. MILLS AND GLENN W. TODD 1145
Germination of *Phaseolus vulgaris*. IV. Patterns of Protein Synthesis in Excised Axes. DOUGLAS F. GILLARD AND DANIEL C. WALTON 1147
Elimination of Bacterial Contamination from Onion Seed. CHARLES H. MALLERY AND PETER W. MELERA 1150

Subject Index

A

Abscisic acid
  amylase synthesis in barley aleurone, 198
  antagonism to IAA
    in barley roots, 154
    in mung bean roots, 150
  inhibition of coleoptile growth, 93
  inhibition of oat coleoptile elongation, 946
  in senescing citrus fruit peel, 879
  root exudation and water permeability, 217
Abscission
  induction at hypobaric pressures, 1002
  inhibition by calcium, 848
  young fruit, regulation by ethylene, 949
Acetylcholine, inhibition of phytochrome-mediated increases in a flavenoid and in phenylalanine ammonia-lyase activity of barley plumules, 407
Actinomycin D, rough endoplasmic reticulum in barley aleurone, 549
Adaptation, chromatic, alga, 382
Adenosine diphosphoglucose pyrophosphorylase in developing corn kernels, 1
Adenosine triphosphatase, salt-stimulated, from microsomes, 1064
Adenosine triphosphate
  closure of Venus's flytrap, 17
  membrane-bound, of oat roots, 749
  ozonated bean foliage, 378
  potato water permeability, 485
  seed vigor, 400
Adenylate, ozonated bean foliage, 378
Albizzia julibrissin, rhythm of pinnules, 1082
Alloenzymes from C_3 and C_4 plants, 439
Aleurone, barley
  hormonal control of amylase synthesis, 198
  rough endoplasmic reticulum, 549
Alga
  chromatic adaptation, 382
  CO formation, 72
  glycerol in osmotic regulation, 875
  nitrate reduction in, 350
Aminoacyl transfer ribonucleic acid synthetase in pea roots, 22
Ammonia, potato water permeability, 485
Ammonium, nitrate reduction in cotton, 332
Amylase
  differentiation between α- and β-, 594
  formation in cotyledons of germinating peas, 708
  hormonal control of synthesis in barley aleurone, 198
Anacystis nidulans, peroxide production by, 104
Anoxia, squash petiole, phloem transport, 368
Anthocyanin, ethylene, light, and synthesis of, 436
Apple
  CO_2 on mitochondrial activity, 1095
  freezing injury in xylem, 273
  leaf senescence, 89
Aspartate transcarbamylase in cowpea hypocotyls, 318
Aspartokinase
  from wheat germ, 322
  in *Lemna minor*, 327
Auxin
  inhibition of ripening in Bartlett pears, 6
  kinetin effect on ethylene production induced by, 1011
  protectors, 391
  regulation of β-glucan synthetase activity, 601, 609
  regulation of indole-3-ethanol oxidase, 739
  role of calcium in transport, 845
  translocation in bean seedlings, 128
  transport in *Selaginella* stem, 646
  transporters in mitochondria, 667
Avocado, survival of mitochondria, 702

B

Bacteria, elimination from onion seed, 1150
Barley
  acidic endopeptidase, 1015
  hormonal control of amylase synthesis, 198
  IAA and ABA antagonism in roots, 154
  lack of turnover of RuDP carboxylase in leaves, 1042
  photochemical activity and cytochrome *b*-559 in greening seedlings, 1117
  rough endoplasmic reticulum in aleurone, 549
Bean
  auxin translocation in seedlings, 128
  calcium inhibition of abscission, 848
  castor
    DNA species from endosperm, 902
    organelle membranes in endosperm, 61
    ribulose-1,5-diP carboxylase in, 755
  chlorophyll formation in greening leaves, 115
  interconversion of protochlorophyll(ide), 139
  light-promoted utilization of calcium, 37
  mitochondrial ultrastructural changes, 26
  mung
    cholinesterase from roots, 520
    dicarboxylic acids and mitochondria, 225
    D-glucosamine-6-P *N*-acetyltransferase from, 1055
    hormone antagonist and rooting, 214
    IAA and ABA antagonism, 150
  osmotic shock and membrane transport, 620
  phytochrome-dependent reduction of NADP, 982
  pinto, effect of ozone on foliage, 378
  proline metabolism in wilted leaves, 508
  protein synthesis in excised axes, 1147
  red kidney
    cell wall hemicellulose, 889
    photophosphorylation during chloroplast development, 386
  snap, embryo development, 454
Beet, sugar
  CO_2 exchange and phosphorus deficiency, 43
  potassium deficiency, 783, 1099
Begonia evansiana, effects of inhibitors on dormancy, 504
Benzyladenine, movement of ^{14}C-labeled photosynthate induced by, 345
Benzylmalonate, oxidation of substrates by mitochondria, 225
Bile pigment formation in algae, 72
Bundle sheath cells from corn leaves, 1133
2-Butylmalonate, oxidation of substrates by mitochondria, 225

C

Cadaverine, separation and characterization, 432
Calcium
  auxin transport, 845
  effects on root exudation, 1061
  growth and wall composition in pea, 312
  inhibition of abscission, 848
  interactions with light in *Chlorella*, 48
  light-promoted utilization by bean, 37
Callus tissue, growth of rice root-derived, 1140
Carbohydrates, diurnal trends in soybean leaves, 871
Carbon, photosynthetic metabolism in corn bundle sheath, 787
Carbon dioxide
  apple mitochondrial activity, 1095
  control of fixation in *Chlamydomonas*, 1142
  lettuce seed thermodormancy, 1089
Carbon isotopes, enzymatic fractionation by PEP carboxylase from C_4 plants, 1051
Carbon monoxide formation in algae, 72
Carboxyl-^{14}C-tripalmitin utilization in pine seeds, 278
Carotenoid of spinach chloroplasts, 584
Carrot
  ethylene-induced phenylalanine ammonia-lyase activity in roots, 1033
  photosynthesis, 685
Cathodoluminescence, herbicide dispersal, 415
Cellobiase from ripening tomato fruits, 577
Cellulase in citrus separation zones, 626
Cell walls, structure, 158, 174, 188
Cheilanthes farinosa, blue light interference in germination, 306
Chilling, inhibition of translocation by, 372
Chlamydomonas
  control of CO_2 fixation, 1142
  light requirements for gametogenesis, 1046
Chlorella
  cyclic photophosphorylation, 825
  heterotrophic growth, 337
  light and Ca^{2+} interactions, 48
  nitrate reductase complex, 591
2-Chloroethylphosphonic acid, determination of megasporangia, 718
Chlorogenic acid biosynthesis in sweet potato, 768
Chlorophyll
  accumulation by developing chloroplasts, 660
  formation in greening bean leaves, 115

Chloroplast
bean, photophosphorylation during development, 386
chlorophyll accumulation, 660
corn, lipid composition, 802
cottonwood, senescence, 245
lettuce, delayed light emission, 1069
maintenance and differentiation, 651
pea, isoenzymes, 259
spinach
activation of polyphenol oxidase, 234
carotenoids, 584
sunflower, response to low leaf water potentials, 989, 993
Cholinesterase from mung bean roots, 520
Circadian rhythms in *Sinapis alba*, 598
Citrus fruit
ABA in peel during senescence, 879
separation zone enzymes, 626
Coleoptile
oat
cell wall stress relaxation after geostimulation, 464
growth inhibition by ABA, 93
inhibition of elongation by ABA, 946
response to kinetin, 405
rhythmicity in basipetal transport of IAA through, 615
rice, IAA uptake, 295
Compression wood response, 777
Corn
bundle sheath photosynthesis, 787
glycerate-3-P synthesis in leaves, 312
glycolate synthesis in leaves, 299
hexokinase from endosperm and scutellem, 960
K^+ transport in mitochondria, 357
light and RNA metabolism in greening leaves, 10
lipid composition of chloroplasts, 802
mesophyll protoplasts and bundle sheath cells from leaves, 1133
nitrate reductase activity and polyribosomal content with low leaf water potentials, 817
nitrate uptake by seedlings, 120
protein synthesis in greening leaves, 671
trans-ribosylzeatin, 563
role of β-cystathionase, 492
root growth, 635
starch biosynthesis in developing kernels, 1
stomatal responses to light and water, 31
Cotton
nitrate reductase in leaf, 332
70S ribosomal content of a mutant, 1138
Cottonwood, chloroplast senescence, 245
Cotyledon
DNA and RNA synthesis, 1005
pea
enzyme formation, 708
mitochondria development during germination, 833
separation of mitochondria, 807
watermelon, enzyme development, 66
Cowpea, aspartate transcarbamylase activity in hypocotyls, 318
Crassulacean acid metabolism, 220
Cucumber
chloroplast differentiation, 651
chlorophyll accumulation, 660
C_x cellulase from ripening tomato fruits, 577
Cyanide, potato water permeability, 485
Cycloheximide, separation zone enzymes in citrus fruits treated with, 626
β-Cystathionase, *in vivo* role, 492
Cytidine 5′-triphosphate, potato water permeability, 485
Cytochrome *b*-559 in greening barley seedlings, 1117
Cytokinin in *Rhizopogon roseolus*, 559

D

Dentaria, petiolar hook opening, 714
Deoxyribonucleic acid
species from castor bean endosperm, 902
synthesis during cotyledon development, 1005
synthesis in potato, 772
synthesis of and thymidine-phosphorylating activity in γ-plantlets, 984
Desiccation, conserved polyribosomes during, 285
Dextran-40, separation of pea cotyledon mitochondria, 807
Dicarboxylic acids, mitochondria, 225
2,4-Dichlorophenoxyacetic acid, aspartate transcarbamylase activity in hypocotyls treated with, 318
o-Dihydroxyphenol, inhibition of glutathione oxidation, 391
2,4-Dinitrophenol, potato water permeability, 485
Dionaea muscipula, ATP in closure, 17
Dormancy
effect of inhibitors on, in *Begonia*, 504
zeatin in release from, 894
Dunaliella parva, glycerol in osmotic regulation, 875

E

Embryo, development in bean, 454
Endopeptidase, acidic, from germinated barley, 1015
Endoplasmic reticulum, rough, in barley aleurone, 549
Endopolygalacturonase, protein inhibition of, 489
Endosperm
analysis of in bean, 454
castor bean
DNA species from, 902
organelle membranes, 61
ribulose-1,5-diP carboxylase in, 755
corn
hexokinase from, 960
wheat, protein in and seedling growth, 57
Epicotyl, pea, effects of calcium and kinetin on growth an wall composition, 312
Epidermis, *Vicia*, organic acid changes, 588
Ethylene
amylase synthesis in barley aleurone, 198
colorimetric determination of nitrogenase, 1074
effect of kinetin on auxin-induced production, 1011
lettuce seed thermodormancy, 1089
light and anthocyanin synthesis, 436
light-induced production in sorghum, 1082
lipid-induced growth and production of, 691
phenylalanine ammonia-lyase activity in carrot roots, 1033
regulation of young fruit abscission, 949
Euglena
malate dehydrogenase isoenzymes, 1127
photosynthetic capacity, 250
ultrastructure of proplastids from dark-grown, 1109

F

Fern, photocontrol of germination, 973
Ferulic acid, peroxidase-catalyzed IAA oxidation, 967
Flowering
induction in *Sinapis alba*, 598
stimulus and inhibition in *Perilla*, 727
Fluoride, influence of fumigation with on soybean water economy, 396
Foliage, bean, effect of ozone, 378
Freezing in apple xylem, 273
Fruit
citrus
ABA in peel during senescence, 879
separation zone enzymes, 626
hormones of ripening grapes, 629
Fumigation, fluoride, water economy of soybean, 396

G

Gametogenesis, light requirements for in *Chlamydomonas*, 1046
Geotrichum candidum, regulation of NADP-specific glutamate dehydrogenase, 852
Geotropic stimulation, stress relaxation of coleoptile cell wall after, 464
Germination
fern, photocontrol, 973
phospholipids of winter wheat, 468
Gibberellic acid
amylase synthesis in barley aleurone, 198
enzyme formation in embryoless wheat grain, 641
oat stem growth, 1102
oat stem segment response to, 1026
rough endoplasmic reticulum in barley aleurone, 549
β-Glucan synthetase, auxin regulation of activity in pea stem, 601, 609
β-(1 → 3)Glucan synthetase, activation, 998
D-Glucosamine 6-phosphate *N*-acetyltransferase from bean, 1055
Glucose, multiphasic uptake in potato, 289
D-Glucose 6-phosphate cycloaldolase, 263
Glutamate dehydrogenase, NADP-specific, regulation in *Geotrichum* spores, 852
Glutathione, auxin protectors, 391
Glyceraldehyde 3-phosphate dehydrogenase, light regulation, 76
Glycerate 3-phosphate synthesis in tomato and maize leaves, 512
Glycerol, osmotic regulation of alga, 875
Glycolate synthesis in tobacco and maize leaves, 299
Glyoxylate reductase, light regulation, 76
Grain
embryoless wheat, 641
rice, protein metabolism, 537
Grape, hormones in ripening berries, 629
Growth, mathematical analysis, 635
Growth regulators, petiolar hook opening, 714

H

Helminthosporium carbonum, abolishment of specific toxicity of host-specific toxin by electrolytic reduction, 403

Hemicellulose
of sycamore cell walls, 174
of sycamore *vs.* bean cell walls, 889
Herbicide, cathodoluminescence, 415
Hexokinase from maize endosperm and scutellum, 960
Host-pathogen interactions, 489
Hydrogen peroxide production by *Anacystis*, 104
Hypobaric pressure, induction of abscission, 1002
Hypocotyl
bean, phytochrome-dependent reduction of NADP, 982
soybean, RNA polymerase, 1022

I

Immunochemistry of phytochrome, 203
Indoleacetic acid
antagonism to ABA
in barley roots, 154
in mung bean roots, 150
ferulic acid and oxidation of, 967
response of *Nicotiana* mesophyll protoplasts, 898
rhythmicity in basipetal transport through coleoptiles, 615
uptake in rice coleoptiles, 295
Indoleacetic acid oxidase, effects of water stress, 1145
Indole-3-ethanol oxidase, kinetics, inhibition, and regulation by auxins, 739
p-Iodobenzylmalonate, oxidation of substrates by mitochondria, 225
Isocitrate lyase in green leaves, 863
Isoenzymes, pea chloroplast, 259
Isoperoxidase, hormonal control in lentil embryonic axis, 146

K

Kinetin
effect on auxin-induced ethylene production, 1011
growth and wall composition in pea, 312
permeability of onion cells, 868
response of coleoptiles to, 405

L

Leaf
apple, senescence, 89
barley, lack of turnover of RuDP carboxylase, 1042
bean
chlorophyll formation during greening, 115
effect of wilting on proline metabolism, 508
interconversion of protochlorophyll(ide), 139
osmotic shock and membrane transport, 620
corn
light and RNA metabolism in, 10
mesophyll protoplasts and bundle sheath cells from, 1133
protein synthesis in greening, 671
device for recording movements, 812
dimensions and air volume with water content changes, 815
green, isocitrate lyase, 863
greening and senescing, lipid transformations in, 229
photosynthetic product variations, 744
rice, protein metabolism, 537
Sedum, isolation of mesophyll cells, 97
soybean, diurnal trends in photosynthesis and carbohydrates, 871
sugar beet
CO_2 exchange and phosphorus deficiency, 43
K deficiency, 783, 1099
sunflower, chloroplast response to low water potentials, 989, 993
tobacco
chemistry altered by near-UV, 723
metabolism in senescing, 793, 798
tobacco and corn, glycolate synthesis, 299
tomato, wound-induced proteinase inhibitor, 19
tomato and corn, glycerate-3-P synthesis, 512
wheat, IAA oxidase, 1145
Lemna minor
aspartokinase in, 327
phosphorylation of ribosomal protein, 760
Lentil, hormononal control of isoperoxidases in embryonic axis, 146
Lettuce
dark phytochrome reversion in seeds, 459
delayed light emission in chloroplasts, 1069
seed thermodormancy, 1089
Light
blue, interference in germination of *Cheilanthes farinosa*, 306
ethylene and anthocyanin synthesis, 436
far red and white, promotion of calcium utilization by bean seedlings, 37
interactions with Ca^{2+} in *Chlorella*, 48
MVA incorporation into tobacco phytosterols, 110
near-UV, tobacco leaf chemistry, 723
petiolar hook opening, 714
regulation of glyceraldehyde-3-P dehydrogenases and glyoxylate reductase, 76
RNA metabolism in greening maize leaves, 10
Lipids
corn chloroplasts, 802
ethylene production and growth induced by, 691

M

Maize. *See* Corn
Malate dehydrogenase isoenzymes in *Euglena*, 1127
Malate dehydrogenase of pea, 1076
Maleic hydrazide, testing of interactions, 810
Megasporangia, *Selaginella* reproduction, 718
Mesophyll cells, isolation from *Sedum* leaves, 97
Mevalonic acid, effect of light on incorporation into tobacco phytosterols, 110
Microsome, turnip, salt-stimulated ATPase from, 1064
Mitochondria
apple, CO_2 effect on activity, 1095
auxin transporters, 667
bean, ultrastructural changes, 26
corn, K^+ transport, 357
germinating pea cotyledons, 833
lipid-protein interaction in chilled sweet potato, 883
mung bean, dicarboxylic acids, 225
survival, 702
Moss, desiccation and conserved polyribosomes, 285
Mustard, light regulation of glyceraldehyde-3-P dehydrogenases and glyoxylate reductase, 76

N

Naphthaleneacetic acid, mechanism of conjugation, 907
Nicotiana, response of mesophyll protoplasts to IAA, 898
Nicotinamide adenine dinucleotide phosphate, phytochrome-dependent reduction, 982
Nicotine content in tobacco plant, 805
Nitrate
pools in plant cells and tissues, 423
uptake by corn seedlings, 120
uptake by ryegrass, 267
Nitrate reductase
complex from *Chlorella*, 591
in cotton leaf, 332
low leaf water potentials, 817
Nitrate reduction in alga, 350
Nitrite production by plant cells and tissues, 423
Nitrogen, diurnal variations in metabolism in expanding leaves, 744
Nitrogenase
colorimetric determination, 1074
soybean, electron carriers from *Rhizobium*, 136

O

Oat
activation of β-(1 → 3)glucan synthetase, 998
characterization of phytochrome, 927
effects of GA and sucrose on stem growth, 1102
geostimulation and cell wall stress relaxation, 464
immunochemistry of phytochrome, 939
inhibition of coleoptile growth by ABA, 93, 946
membrane-bound ATPases of roots, 749
phytochrome purification, 917
stem segment response to GA_3, 1026
Oligomycin, potato water permeability, 485
Onion
effect of kinetin on permeability, 868
elimination of bacterial contamination from seed, 1150
Organelle membranes in castor bean endosperm, 61
Osmotic potential, chloroplast response, 993
Osmotic shock, membrane transport, 620
Oxygen, nitrate reduction in cotton, 332
Ozone, effect on bean foliage, 378

P

Pea
aminoacyl-tRNA synthetases in roots, 22
auxin regulation of β-glucan synthetase activity, 601, 609
chloroplast isoenzymes, 259
development of mitochondria during germination, 833

Pea—*Continued*
effects of calcium and kinetin on growth and wall composition, 312
enzyme formation in cotyledons of germinating, 708
malate dehydrogenases of, 1076
separation of cotyledon mitochondria, 807
Peanut, calcium effects on root exudation, 1061
Pear, Bartlett, auxin inhibition of ripening, 6
Pectinase in citrus separation zones, 626
Perilla, floral stimulus and inhibition, 727
Peroxidase, IAA oxidation and ferulic acid, 967
Petiolar hook, *Dentaria*, light and growth regulators in opening of, 714
Petiole, effect of anoxia on phloem transport, 368
Phenolic acids, inhibition of phosphate uptake, 1037
Phenylalanine ammonia-lyase
determination of, 409
ethylene-induced activity in carrot roots, 1033
2-Phenylsuccinate, oxidation of substrates by mitochondria, 225
Phloem, effect of petiole anoxia on transport, 368
Phosphate, phenolic acids and inhibition of uptake of, 1037
Phosphoenolpyruvate carboxylase
enzymatic fractionation of carbon isotopes, 1051
photosynthetic, 439
with different metabolic pathways, 448
Phospholipids of germinating winter wheat, 468
Phosphorus, effects of deficiency of on photosynthesis and respiration of sugar beat leaves, 43
Phosphorylase in developing corn kernels, 1
Photoperiodism, crassulacean acid metabolism, 220
Photophosphorylation
cyclic, 825
delayed light emission, 1069
during bean chloroplast development, 386
Photorespiration, glycolate synthesis, 299
Photoresponses, new, of *Phycomyces*, 570
Photosynthesis
carrot, 685
corn bundle sheath, 787
diurnal variations in products in expanding leaves, 744
Euglena, 250
ozonated bean foliage, 378
Phycomyces
mechanical behavior, 586
new photoresponses, 570
Phytochrome
comparative immunochemistry, 203
dark reversion in lettuce seeds, 459
germination of *Cheilanthes farinosa* spores, 306
IAA uptake, 295
in *Spirodela*, 474
large and small, 210
lettuce seed thermodormancy, 1089
oat and rye
characterization, 927
immunochemistry, 939
purification of, 917
reduction of NADP in bean hypocotyl, 982
stomatal opening, 543
Phytosterol, tobacco, effect of light on MVA incorporation into, 110
Pine
chronic internal radiation, 954
compression wood response, 777
tripalmitin utilization in seeds, 278
Pinnule, *Albizzia julibrissin*, rhythm, 1084
Polyamines, soybean, 432
Polyethylene glycol 6000, osmotic potential, 914
Polyphenol oxidase of chloroplasts, 234
Polyphenols during growth of tobacco flower and capsule, 839
Polyribosomes
low leaf water potentials, 817
moss, conserved, and desiccation, 285
Polysaccharides, pectic, structure, 158
Potassium
deficiency in sugar beet, 783
effects of deficiency on leaf respiration, 1099
transport in corn mitochondria, 357
Potato
DNA synthesis, 772
multiphasic glucose uptake, 289
sweet
chilling injury, 883
chlorogenic acid biosynthesis, 768
Proline metabolism in wilted leaves, 508
Proplastid, *Euglena*, ultrastructure, 1109
Protease formation in cotyledons of germinating peas, 708
Protein
endosperm, wheat seedling growth, 57
metabolism in rice leaves and grain, 537
patterns of synthesis in excised axes, 1147
release after osmotic shock, 620
ribosomal, phosphorylation in *Lemna minor*, 760
synthesis in greening maize leaves, 671
Proteinase inhibitor, wound-induced, in tomato leaves, 19
Protochlorophyll(ide), interconversion, 139
Protoplast
mesophyll, from corn leaves, 1133
Nicotiana mesophyll, response to IAA, 898

Q

Quinones, cell permeability changes, 363

R

Rehydration *vs.* growth-induced water uptake in plant tissues, 859
Rhizobitoxine inactivation of β-cystathionase, 492
Rhizobium, electron carriers from, 136
Rhizopogon roseolus
cytokinins in, 559
trans-ribosyzeatin biosynthesis, 563
Ribonucleic acid
effect of light on metabolism in greening maize leaves, 10
genes for cytoplasmic ribosomal, 677
polymerase from soybean hypocotyl, 1022
studies on rapidly labeled, 412
synthesis during cotyledon development, 1005
Ribosome, 70S, of cotton mutant, 1138
trans-Ribosylzeatin, biosynthesis of, 563
Ribulose 1,5-diphosphate carboxylase
in castor beans, 755
lack of turnover in barley leaves, 1042
Rice
growth of root-derived callus tissue, 1140
IAA uptake in coleoptiles, 295
starch breakdown in germinating, 979
Ripening, inhibition by auxin in Bartlett pears, 6
Root
barley, IAA and ABA antagonism, 154
carrot, ethylene-induced phenylalanine ammonia-lyase activity, 1033
corn, growth, 635
mung bean
cholinesterase from, 520
IAA and ABA antagonism, 150
oat, membrane-bound ATPases, 749
pea, aminoacyl-tRNA synthetases in, 22
peanut, calcium effects on exudation, 1061
sunflower, ABA and exudation, 217
sweet potato, chlorogenic acid biosynthesis, 768
Vitis vinifera, benzyladenine-induced movement of ^{14}C-labeled photosynthate into, 345
Rooting, hormone antagonist, 214
Rubidium, guard cell uptake in *Vicia*, 82
Rye
characterization of phytochrome, 927
immunochemistry of phytochrome, 939
phytochrome purification, 917
Ryegrass, influx and efflux of nitrate, 267

S

Salinity, wheat seedling growth, 987
Salt, ATPase from microsomes, 1064
Scutellum, corn, hexokinase from, 960
Sedum, isolation of leaf cells, 97
Seed
ATP content and vigor, 400
lettuce
dark phytochrome reversion, 459
thermodormancy, 1089
onion, elimination of bacterial contamination from, 1150
pea, chloroplast isoenzymes, 259
pine, tripalmitin utilization, 278
rice, starch breakdown, 979
zeatin during germination and release from dormancy, 894
Seedling
barley, photochemical activity and cytochrome *b*-559, 1117
bean
auxin translocation, 128
light-promoted utilization of calcium, 37
corn
nitrate uptake, 120
role of β-cystathionase, 492
tobacco, MVA incorporation into phytosterols, 110
watermelon, enzyme development, 66
wheat
endosperm protein and growth of, 57
salinity and growth, 987
Selaginella
auxin transport in stem, 646
reproductive biology, 718
Senescence
apple leaf, 89
citrus fruit, ABA in peel, 879
cottonwood chloroplasts, 245

lipid transformations in leaf, 229
metabolism in tobacco leaf, 793, 798
Sinapis alba, circadian rhythms and induction of flowering, 598
Sodium, low supply of, and K deficiency in sugar beet leaves, 1099
Sodium chloride, inhibition of light and Ca^{2+} interactions in *Chlorella*, 48
Sorghum
light-induced ethylene production, 1082
stomatal responses to light and water, 31
Soybean
diurnal trends in photosynthesis and carbohydrates, 871
electron carriers from *Rhizobium*, 136
floating macromolecular complex, 529
fluoride fumigation and water economy, 396
polyamines, 432
RNA polymerase from hypocotyl, 1022
Spermidine, RNA polymerase from soybean hypocotyl, 1022
Spinach
carotenoids of chloroplasts, 484
polyphenol oxidase of chloroplasts, 234
Spirodela, growth, greening, and phytochrome, 474
Squash, effect of petiole anoxia on phloem transport, 368
Starch
biosynthesis in maize kernels, 1
breakdown in germinating rice seeds, 979
Stem
electrical impedance, 478
oat
effects of GA and sucrose on growth, 1102
response to GA_3, 1026
pea, auxin regulation of β-glucan synthetase activity, 601, 609
Selaginella, auxin transport, 646
Stomata
action spectra for in *Vicia faba*, 82
organic acid changes in *Vicia* epidermis, 588
penetration by liquids, 596
photoreactions and phytochrome in opening, 543
Stomatal behavior of maize, sorghum, and tobacco under field conditions, 31
Sucrose, oat stem growth, 1102
Sugar, calcium effects on root exudation of, 1061
Sunflower, calcium in auxin transport, 845
Sycamore
cell wall hemicellulose, 889
hemicellulose of cell walls, 174
macromolecular cell wall components, 158
model of cell walls based on interconnections of macromolecular components, 188

T

Thermodormancy, lettuce seed, 1089
Thymidine-phosphorylating activity in γ-plantlets, 984
Tobacco
glycolate synthesis in leaves, 299
leaf chemistry altered by near-UV, 723
metabolism in senescing leaf, 793, 798
MVA incorporation into phytosterols, 110
nicotine content of plant, 805
polyphenols during growth of flower and capsule, 839
stomatal responses to light and water, 31
water potential gradients, 223
Tolypothrix tenuis, chromatic adaptation, 382
Tomato
C_x cellulase and cellobiase from ripening fruits, 577
glycerate-3-P synthesis in leaves, 512
wound-induced proteinase inhibitor in leaves, 19
Translocation, chilling inhibition of, 372
Tripalmitin utilization in pine seeds, 278
Turgor, chloroplast response, 989
Turnip, salt-stimulated ATPase from microsomes, 1064

U

Uridine diphosphoglucose pyrophosphorylase in developing corn kernels, 1

V

Vanadium uptake by plants, 828
Venus's flytrap, ATP in closure of, 17
Vicia faba
action spectra for stomata, 82
DNA and RNA synthesis in cotyledons, 1005
organic acid changes in epidermis, 588

W

Watermelon, enzyme development in seedlings, 66
Water permeability, reduction of in potato, 485
Water status, stomatal behavior, 31
Water stress, IAA oxidase in wheat, 1145
Water uptake in plant tissues *vs.* rehydration, 859
Wheat
amylases in embryoless grain, 641
endosperm protein and seedling growth, 57
IAA oxidase, 1145
salinity and seedling growth, 987
winter, phospholipids during germination, 468
Wheat germ, aspartokinase from, 322
Wounding, proteinase inhibitor in tomato leaves, 19

X

Xylem, apple, freezing injury, 273

Z

Zeatin during seed germination and release from dormancy, 894

Volume Contents

Number 1. July

Abscission. Support for a Role of Ethylene Modification of Auxin Transport. ELMO M. BEYER, JR. 1
Characterization of Plasma Membrane-associated Adenosine Triphosphatase Activity of Oat Roots. R. T. LEONARD AND T. K. HODGES 6
An Arginyl-Transfer Ribonucleic Acid Protein Transferase from Cereal Embryos. CHARLES O. MANAHAN AND ALVA A. APP 13
Metabolism of Separated Leaf Cells. III. Effects of Calcium and Ammonium on Product Distribution during Photosynthesis with Cotton Cells. D. W. REHFELD AND R. G. JENSEN 17
Promotion of Seed Germination by Cyanide. R. B. TAYLORSON AND S. B. HENDRICKS 23
Response of Carbon Dioxide Fixation to Water Stress. Parallel Measurements on Isolated Chloroplasts and Intact Spinach Leaves. Z. PLAUT AND B. BRAVDO 28
The Effect on Net Photosynthesis of Pedigree Selection for Low and High Rates of Photorespiration in Tobacco. ISRAEL ZELITCH AND P. R. DAY 33
Ethylene Production and Respiratory Behavior of the *rin* Tomato Mutant. R. C. HERNER AND K. C. SINK, JR. 38
Comparative Studies on Tobacco Pith and Sweet Potato Root Isoperoxidases in Relation to Injury, Indoleacetic Acid, and Ethylene Effects. H. BIRECKA, K. A. BRIBER, AND J. L. CATALFAMO 43
Enzymes of Phospholipid Metabolism in the Endoplasmic Reticulum of Castor Bean Endosperm. T. S. MOORE, J. M. LORD, T. KAGAWA, AND HARRY BEEVERS 50
Circular Dichroism Spectra of Granal and Agranal Chloroplasts of Maize. ÁGNES FALUDI-DÁNIEL, S. DEMETER, AND A. S. GARAY 54
Optical Parameters of Leaves of 30 Plant Species. H. W. GAUSMAN AND W. A. ALLEN 57
Properties of an Aminotransferase of Pea (*Pisum sativum* L.). MICHAEL E. MATHERON AND THOMAS C. MOORE 63
Some Aspects of the Regulation of Arginine Biosynthesis in Soybean Cell Cultures. P. D. SHARGOOL 68
Growth of Plants in Solution Culture Containing Low Levels of Chromium. E. W. D. HUFFMAN, JR., AND W. H. ALLAWAY 72
Comparative Effects of Hydrogen Ions, Carbon Dioxide, and Auxin on Pea Stem Segment Elongation. GRANT M. BARKLEY AND A. C. LEOPOLD 76
Application of Chemicals in Organic Solvents to Dry Seeds. A. A. KHAN, K. L. TAO, AND C. H. ROE 79
An Excellent Source of Vegetative Buds for Use in Plant Hormone Studies on Apical Dominance. THOMAS W. BUDD 82
Flow of Chromium into Apple Fruit during Development. DAVID R. COAHRAN, R. C. MAXWELL, AND MILTON ZUCKER 84
Instructions for Contributors i

Number 2. August

The Nutritional Role of Pistil Exudate in Pollen Tube Wall Formation in *Lilium longiflorum*. II. Production and Utilization of Exudate from Stigma and Stylar Canal. C. LABARCA AND F. LOEWUS 87
Effects of Filipin and Cholesterol and K^+ Movement in Etiolated Stem Cells of *Pisum sativum* L. DONALD L. HENDRIX AND N. HIGINBOTHAM 93
Isolation and Characterization of Glucosamine-containing Storage Glycoproteins from the Cotyledons of *Phaseolus aureus*. MARY C. ERICSON AND MAARTEN J. CHRISPEELS 98
Polarity and Rate of Transport of Cyclic Adenosine 3′,5′-Monophosphate in the Coleoptile. S. A. GORDON, E. CAMERON, AND J. SHEN-MILLER 105
Nonreversible D-Glyceraldehyde 3-Phosphate Dehydrogenase of Plant Tissues. G. J. KELLY AND MARTIN GIBBS 111
Bicarbonate Ion as a Critical Factor in Photosynthetic Oxygen Evolution. ALAN STEMLER AND GOVINDJEE 119
De Novo Synthesis of Phytochrome in Pumpkin Hooks. P. H. QUAIL, E. SCHÄFER, AND D. MARMÉ 124
Turnover of Phytochrome in Pumpkin Cotyledons. P. H. QUAIL, E. SCHÄFER, AND D. MARMÉ 128
Effect of Water on the Ripening of Pericarp Disks from Tomato Fruits. DAVID H. SIMONS AND JOHAN BRUINSMA 132
The Interaction of Respiration and Photosynthesis in Induction of Nitrate Reductase Activity. M. ASLAM, R. C. HUFFAKER, AND R. L. TRAVIS 137
The Effect of Arsenate and Other Inhibitors on Early Events during the Germination of Lettuce Seeds (*Lactuca sativa* L.). HENRY L. SPEER 142
Organic Acids and Iron Translocation in Maize Genotypes. R. B. CLARK, L. O. TIFFIN, AND J. C. BROWN 147
Incorporation of ^{14}C-Leucine into Apple Leaf Protein and Its Inhibition by Protein Synthesis Inhibitors during Growth and Senescence. PATRICIA W. SPENCER 151
Fat Metabolism in Higher Plants. LVII. A Comparison of Fatty Acid-synthesizing Enzymes in Chloroplasts Isolated from Mature and Immature Leaves of Spinach. C. GAMINI KANNANGARA, BRUCE S. JACOBSON, AND P. K. STUMPF 156

Mechanism of Plant Growth Stimulation by Naphthenic Acid. Effects on Nitrogen Metabolism of *Phaseolus vulgaris* L. D. J. WORT, J. G. SEVERSON, JR., AND DAVID R. PEIRSON 162
Rhythmic Differences in the Basipetal Movement of Indoleacetic Acid between Separated Upper and Lower Halves of Geotropically Stimulated Corn Coleoptiles. J. SHEN-MILLER 166
Effects of Cycloheximide on Indoleacetic Acid-induced Ethylene Production in Pea Root Tips. DAVID A. STEEN AND ARTHUR V. CHADWICK 171
Early Actions of Gibberellic Acid on the Embryo and on the Endosperm of *Avena fatua* Seeds. SHEPLEY S. C. CHEN AND WON-MOK PARK 174
Ethylene, Carbon Dioxide, and Anthocyanin Synthesis. L. E. CRAKER AND P. J. WETHERBEE 177
Plants under Climatic Stress. V. Chilling and Light Effects on Radiocarbon Exchange between Photosynthetic Intermediates of *Sorghum*. I. R. BROOKING AND A. O. TAYLOR 180
Vanadium and Plant Nutrition. The Growth of Lettuce (*Lactuca sativa* L.) and Tomato (*Lycopersicon esculentum* Mill.) Plants in Nutrient Solutions Low in Vanadium. ROSS M. WELCH AND EDWARD W. D. HUFFMAN, JR. 183
Inactivity of 3-Methyleneoxindole as Mediator of Auxin Action on Cell Elongation. MICHAEL L. EVANS AND PETER M. RAY 186

Number 3. September

The Distribution and Characteristics of Nitrate Reductase and Glutamate Dehydrogenase in the Maize Seedling. W. WALLACE 191
A Nitrate Reductase Inactivating Enzyme from the Maize Root. W. WALLACE 197
Rhythmic Leaflet Movement in *Albizzia julibrissin*. Effect of Electrolytes and Temperature Alteration. RUTH L. SATTER, PHILIP B. APPLEWHITE, DAVID J. KREIS, JR., AND ARTHUR W. GALSTON 202
Hormonal Control of Orthophosphate Incorporation into Phospholipids of Barley Aleurone Layers. D. E. KOEHLER AND J. E. VARNER 208
Flower Formation in Excised Tobacco Stem Segments. III. Deoxyribonucleic Acid Content in Stem Tissue of Vegetative and Flowering Tobacco Plants. WILLIAM L. WARDELL AND FOLKE SKOOG 215
Regulation of Invertase Levels in *Avena* Stem Segments by Gibberellic Acid, Sucrose, Glucose, and Fructose. PETER B. KAUFMAN, NAJATI S. GHOSHEH, J. DONALD LACROIX, SARVJIT L. SONI, AND HIROSHI IKUMA 221
Zinc Deficiency, Carbonic Anhydrase, and Photosynthesis in Leaves of Spinach. P. J. RANDALL AND D. BOUMA 229
Cholinesterases from Plant Tissues. II. Inhibition of Bean Cholinesterase by 2-Isopropyl-4-dimethylamino-5-methylphenyl-1-piperidine Carboxylate Methyl Chloride (AMO-1618). J. RIOV AND M. J. JAFFE 233
Deferral of Leaf Senescence with Calcium. B. W. POOVAIAH AND A. C. LEOPOLD 236
Plastid Differentiation, Acyl Lipid, and Fatty Acid Changes in Developing Green Maize Leaves. RACHEL M. LEECH, M. G. RUMSBY, AND W. W. THOMSON 240
Triparanol Inhibition of Sterol Biosynthesis in *Chlorella ellipsoidea*. J. T. CHAN AND G. W. PATTERSON 246
Turgor-dependent Changes in *Avena* Coleoptile Cell Wall Composition. WAYNE H. LOESCHER AND DONALD J. NEVINS 248
Separation and Characterization of Endopolygalacturonase and Exopolygalacturonase from Peaches. R. PRESSEY AND J. K. AVANTS 252
Photochemical Properties of Mesophyll and Bundle Sheath Chloroplasts of Maize. MAARIB BAKRI BAZZAZ AND GOVINDJEE 257
Peroxidase Activity in the Abscission Zone of Bean Leaves during Abscission. B. W. POOVAIAH AND H. P. RASMUSSEN 263
Lipids in Rye Seedlings in Relation to Vernalization. LAWRENCE W. THOMSON AND SAUL ZALIK 268
Changes in the Activity of Some Hydrolases, Peroxidase, and Catalase in the Rice Seed during Germination. EVELYN P. PALMIANO AND BIENVENIDO O. JULIANO 274
Cyclic Nucleotide Phosphodiesterase Activity in Barley Seeds. JOZEF VANDEPEUTE, RAY C. HUFFAKER, AND ROBERT ALVAREZ 278
Photosynthetic Reactions in the Marine Alga *Codium vermilara*. I. CO_2 Fixation and Hill Reaction in Isolated Chloroplasts. MORDECHAY SCHONFELD, MENACHEM RAHAT, AND JOSEPH NEUMANN 283
Dark Release of $^{14}CO_2$ from Higher Plant Leaves. TOMMY WYNN, HAROLD BROWN, WILBUR H. CAMPBELL, AND C. C. BLACK, JR. 288
Specific Degradation of a Plant Leucyl Transfer Ribonucleic Acid by a Factor in the Homologous Synthetase Preparation. DONNER F. BABCOCK AND ROY O. MORRIS 292
Increased Electron Density of Tonoplast Membranes in Washed Corn Root Tissue. J. B. HANSON, R. T. LEONARD, AND H. H. MOLLENHAUER 298
Corrections 301

Number 4. October

Gibberellic Acid and Ion Release from Barley Aleurone Tissue. Evidence for Hormone-dependent Ion Transport Capacity. RUSSELL L. JONES 303
Phytochrome Destruction. An Apparent Requirement for Protein Synthesis in the Induction of the Destruction Mechanism. GEORGE H. KIDD AND LEE H. PRATT 309
Pyruvate Kinase, a Possible Regulatory Enzyme in Higher Plants. RONALD G. DUGGLEBY AND DAVID T. DENNIS 312

The Occurrence of Glycolate Dehydrogenase and Glycolate Oxidase in Green Plants. An Evolutionary Survey. SUE ELLEN FREDERICK, PETER J. GRUBER, AND N. E. TOLBERT 318
Influence of Temperature on Sterol Biosynthesis in *Triticum aestivum*. D. L. DAVIS AND V. C. FINKNER 324
Phytochrome Properties and the Molecular Environment. R. E. KENDRICK AND C. J. P. SPRUIT 327
Mineral Nutrient Requirements of Cucumber Seedlings. TORSTEN INGESTAD 332
Polyribosomes from Peas. II. Polyribosome Metabolism during Normal and Hormone-induced Growth. ERIC DAVIES AND BRIAN A. LARKINS 339
The Velocities of Ion Transport Into and Through the Xylem of Roots. Findings with a Two-Point Application Pulse-Chase Technique. EMANUEL EPSTEIN AND J. D. NORLYN 346
Some Physiological Effects of Viviparous Genes vp_1 and vp_8 on Developing Maize Kernels. GEORGE F. WILSON, A. M. RHODES, AND D. B. DICKINSON 350
Phosphoenolpyruvate Carboxykinase in Plants Exhibiting Crassulacean Acid Metabolism. P. DITTRICH, WILBUR H. CAMPBELL, AND C. C. BLACK, JR. 357
Regulation of Nitrate Uptake in *Penicillium chrysogenum* by Ammonium Ion. JANET GOLDSMITH, JOHN P. LIVONI, CAROL L. NORBERG, AND IRWIN H. SEGEL 362
Chromatin-directed Ribonucleic Acid Synthesis. A Comparison of Chromatins Isolated from Healthy, Avirulent *Agrobacterium tumefaciens* Inoculated, and Crown-Gall Tumor Tissues of *Vicia faba*. R. M. NILES AND M. S. MOUNT 368
Activation and Inhibition of Ribulose 1,5-Diphosphate Carboxylase by 6-Phosphogluconate. DOUGLAS K. CHU AND J. A. BASSHAM 373
Initiation of Ripening in Bartlett Pear with an Antiauxin α(*p*-Chlorophenoxy)isobutyric Acid. CHAIM FRENKEL AND NORMAN F. HAARD 380
Some Physiological Characteristics of the Ethylene-requiring Tomato Mutant Diageotropica. R. W. ZOBEL 385
Occurrence of a Temperature-induced Phase Transition in Mitochondria Isolated from Apple Fruit. W. B. MCGLASSON AND J. K. RAISON 390

Number 5. November

Translocation of Iron from Soybean Cotyledons. LEE O. TIFFIN, R. L. CHANEY, AND J. E. AMBLER 393
A Variation of C_4 Leaf Anatomy in *Arundinella hirta* (Gramineae). R. KENT CROOKSTON AND DALE N. MOSS 397

Subject Index

A

Abscisic acid
  absorption and distribution in cotton seedlings, 443
  metabolism of radioactive gibberellins, 546
Abscission
  ethylene-induced, leaf age, 667
  ethylene modification of auxin transport, 1
Abscission zone of bean leaves
  calcium in, 683
  peroxidase activity, 263
Acyl lipid in green corn leaves, 240
Adenine nucleotide, functioning of transporter in arsenate uncoupling of corn mitochondria, 431
Adenosine monophosphate, cyclic, transport in coleoptile, 105
Adenosine triphosphatase, plasma membrane-associated activity of oat roots, 6
Adenosine 5′-triphosphate-sulfurylase in corn roots, 580
Albizzia julibrissin, rhythmic leaflet movement, 202
Aleurone, barley
  control of phospholipid labeling, 208
  GA and ion release from, 303
Alga
  blue-green, enzyme activities in heterocysts, 480
  inhibition of sterol synthesis, 246
  marine, photosynthetic reactions, 283
Allomyces, activity and uptake of sirenin, 527
Amino acid uptake by pea leaf, 633
δ-Aminolevulinic acid, interconversion of protochlorophyllide in bean leaves treated with, 590
Aminotransferase, pea, 63
Ammonium
  effects on product distribution during photosynthesis with cotton cells, 17
  water stress in tomato, 677
Ammonium ion, regulation of nitrate uptake in *Penicillium*, 362
AMO-1618, cholinesterase inhibition, 233
Anthocyanin, ethylene, CO_2, and synthesis of, 177
Antiauxin, initiation of ripening in pear, 380
Apple
  flow of chromium into fruit during development, 84
  leaf protein synthesis and inhibition, 151
  phase transition in mitochondria, 390
Arginine biosynthesis in soybean cells, 68
Arginyl-transfer ribonucleic acid protein transferase from cereal embryos, 13
Arsenate
  functioning of adenine nucleotide transporter in uncoupling of corn mitochondria, 431
  germination of lettuce seeds, 142
Arundinella hirta, variation of C_4 leaf anatomy, 397
Auxin
  ethylene modification of transport of in abscission, 1
  geostimulation and rhythmic movement of, 166
  inactivity of 3-methyleneoxindole, 186
  pea stem elongation, 76
  polyribosome level in soybean hypocotyl, 601

B

Bark, cotton stem, temperature and water potential flux, 565
Barley
  absorption of 2,4-D and Monuron by roots, 638
  control of phospholipid labeling, 208
  cyclic nucleotide phosphodiesterase activity in seeds, 278
  GA and ion release from aleurone, 303
  metabolism of radioactive gibberellins, 546
  O_2 effect on stomata, 601
Bean
  binding of Sr^{2+} to mitochondria, 459
  calcium in abscission zone, 683
  castor, phospholipid metabolism, 50
  changes in anatomy and cellulase, 554
  cholinesterase inhibition, 233
  glucosamine-containing storage glycoproteins, 98
  influence of translocation on photosynthetic efficiency, 412
  interconversion of protochlorophyllide, 590
  naphthenate effects on N metabolism, 162
  peroxidase activity in leaf abscission zone, 263
  protein breakdown and protease formation, 671
Beet, sugar, solute levels and phloem transport, 585
Bicarbonate ion in oxygen evolution, 119
Bud, vegetative, source of, for plant hormone studies, 82

C

Calcium
  deferral of leaf senescence, 236
  effects on product distribution during photosynthesis with cotton cells, 17
  in bean abscission zone, 683
  inhibition of postoxidative release of, in corn mitochondria by inorganic phosphate, 403
  polyribosome degradation, 655
Callus, tobacco, effect of T-2 toxin, 660
Camellia sasanqua, acceleration of pollen growth by soaking in organic solvent, 508
Carbohydrates, incorporation of residues into peroxidase isoenzymes in horseradish roots, 462
Carbon
  $^{13}C/^{12}C$ ratio changes in Crassulacean acid metabolism plants, 427
  recycling through Crassulacean acid metabolism, 539
Carbon dioxide
  dark release from higher plant leaves, 288
  ethylene and anthocyanin synthesis, 177
  fixation under water stress, 28
  in marine alga, 283
  metabolism in leaf epidermal tissue, 448
  pea stem elongation, 76
Carbonic anhydrase in spinach leaves, 229
Catalase in germinating rice seed, 274
Cellulase pattern changes in bean, 554
Cell wall, generative, development of in *Monotropa uniflora*, 498
Cereal, arginyl-tRNA protein transferase from embryos, 13
Chlorella
  inhibition of sterol synthesis, 246
  proline uptake and utilization, 561
  sequence of formation of phosphoglycolate and glycolate during photosynthesis, 407
Chlorogenic acid, chlorophyll content in tobacco leaves, 422
α(*p*-Chlorophenoxy)isobutyric acid, initiation of ripening in pear, 380
3-(*p*-Chlorophenyl)-1,1-dimethylurea absorption by barley roots, 638
Chlorophyll, chlorogenic acid content in tobacco leaves, 422
Chloroplasts
  corn
    circular dichroism spectra, 54
    mesophyll and bundle sheath, 257
  spinach
    CO_2 fixation under water stress, 28
    fatty acid synthesis, 156
    inhibition of photophosphorylation, 680
  transfer of NADP from, 674
Cholesterol, K^+ movement in pea stem cells, 93
Cholinesterase inhibition by AMO-1618, 233
Chromatin from *Agrobacterium tumefaciens*-inoculated and crown gall tissues, 368
Chromium
  flow into apple fruit during development, 84
  plant growth, 72
Codium vermilara, photosynthesis, 283
Coenzyme Q, succinate dehydrogenase, in higher plants, 622
Cold tolerance, cysteine, 685
Coleoptile
  corn, geostimulation and rhythmic auxin movement, 166
  corn and oats, cAMP transport, 105
  oat, turgor-dependent changes in cell walls, 248
Corn
  acquisition of photosynthetic competence by plastids, 491
  ATP-sulfurylase in roots, 580
  cell wall polysaccharide, 646

Corn—*continued*
circular dichroism spectra of chloroplasts, 54
effects of moisture deficits on ^{13}C translocation, 436
effects of toxin on solute absorption, 518
electron density of tonoplast membranes, 298
functioning of adenine nucleotide transporter in arsenate uncoupling of mitochondria, 431
geostimulation and rhythmic auxin movement, 166
Helminthosporium carbonum toxin and nitrate uptake, 513
inhibition of postoxidative calcium release in mitochondria by inoganic phosphate, 403
mesophyll and bundle sheath chloroplasts, 257
nitrate reductase and glutamate dehydrogenase in seedling, 191
nitrate reductase-inactivating enzyme from root, 197
organic acids and iron translocation, 147
physiology of vivipary, 350
plastids and lipids in green leaves, 240
Cotton
2-^{14}C-abscisic acid in seedlings, 443
leaf age and ethylene-induced abscission, 667
photosynthesis with leaf cells, 17
temperature and water potential flux, 565
Cotyledon
bean
glucosamine-containing storage glycoproteins, 98
protein breakdown and protease formation, 671
pea, mitochondrial development, 575
pumpkin, phytochrome turnover, 128
soybean, translocation of iron from, 393
Crassulacean acid metabolism, recycling carbon through, 539
Crassulacean acid metabolism plants
$^{12}C/^{13}C$ ratio changes, 427
phosphoenolypyruvate carboxykinase in, 357
purification of mesophyll protoplasts from, 484
Crown gall tumor, RNA polymerase from tissues, 368
Cucumber, mineral nutrient requirements of seedlings, 332
Cyanide, promotion of seed germination, 23
Cycloheximide, ethylene production in pea roots, 171
Cysteine, cold tolerance, 685
Cytokinin 7-glucoside, formation, isolation, and biological activity, 627
Cytoplasm, transfer of NADP from chloroplasts, 674

D

Diageotropica, an ethylene-requiring tomato mutant, 385
Dicamba, ethylene in purslane response to, 466
2,4-Dichlorophenoxyacetic acid absorption by barley roots, 638
Dichroism spectra, circular, of corn chloroplasts, 54
Dock, curly, phytochrome transformation and action in seeds during secondary dormancy, 475
Dogwood, cold tolerance and cysteine, 685
Dormancy
protein synthesis in lettuce seeds, 604
secondary, phytochrome transformation and action in dock seeds, 475
Drought. *See* Stress, water

E

Electrolytes, rhythmic leaflet movement, 202
Electron density of tonoplast membranes in corn root, 298
Endoplasmic reticulum, castor bean, phospholipid metabolism, 50
Endopolygalacturonase from peach, 252
Ethylene
CO_2 and anthocyanin synthesis, 177
effects of cycloheximide on production of in pea roots, 171
leaf age and abscission induced by, 667
modification of auxin transport in abscission, 1
participation in common purslane response to dicamba, 466
production in *rin* tomato, 38
tobacco and sweet potato isoperoxidases, 43
tomato mutant requiring, 385

F

Fatty acid
changes in green corn leaves, 240
synthesis by chloroplasts, 156
Filipin, K^+ movement in pea stem cells, 93
Flower formation in tobacco stem segments, 215
Fluoride, influence of stress on fumigation injury to soybeans, 542
Fructose, regulation of invertase levels, 221
Fruit
apple
flow of chromium into, during development, 84
phase transition in mitochondria, 390
tomato, water and ripening, 132
Fusarium tricinctum, inhibition of hypocotyl elongation by T-2 toxin, 663

G

Galactoglycerol turnover in *Ochromonas*, 613
Geostimulation, rhythmic auxin movement, 166
Germination
cyanide promotion, 23
effects of octanoate and oleate on isocitrate lyase activity, 549
enzymes in rice seeds, 274
metabolic inhibitors, 142
mitochondrial development during, 575
Gibberellin
early actions in seed, 174
radioactive, ABA effect on metabolism, 546
regulation of invertase levels, 221
release from barley aleurone, 303
Glucosamine, storage glycoproteins containing, 98
Glucose regulation of invertase levels, 221
Glutamate dehydrogenase in corn seedling, 191
D-Glyceraldehyde 3-phosphate dehydrogenase, nonreversible, 111
Glycolate, formation in photosynthesizing *Chlorella*, 407
Glycolate dehydrogenase in green plants, 318
Glycolate oxidase in green plants, 318
Glycoprotein, storage, glucosamine-containing, 98
Grass, C_4, variation of leaf anatomy, 397
Greening of sorghum leaves, and 4-hydroxycinnamic acid hydroxylase activity, 453
Growth
chromium, 72
polyribosome metabolism during hormone-induced, 339
stimulation by naphthenate, 162

H

Half-seeds, barley, metabolism of radioactive gibberellins, 546
Helminthosporium carbonum
effects of toxin on nitrate uptake and reduction in corn, 513
effects of toxin on solute absorption by corn roots, 518
Helminthosporium maydis, induction of stomatal closure by pathotoxin, 569
Heterocysts of blue-green alga, enzyme activities, 480
Hill reaction in marine alga, 283
Horseradish, incorporation of carbohydrate residues into peroxidase isoenzymes in roots, 462
Hydrogen ions, pea stem elongation, 76
Hydrolase in germinating rice seed, 274
4-Hydroxycinnamic acid hydroxylase activity, greening of sorghum leaves, 453
Hypocotyl, soybean
auxin-enhanced polyribosome formation, 608
inhibition of elongation by T-2 toxin, 663

I

Indoleacetic acid
cycloheximide and ethylene production in pea roots, 171
tobacco and sweet potato isoperoxidases, 43
Invertase regulation of levels in oat stem, 221
Iris, terpene biosynthesis, 416
Iron
translocation from soybean cotyledons, 393
translocation in corn genotypes, 147
Isocitrate lyase, effects of octanoate and oleate on activity during germination, 549
Isoperoxidase, tobacco and sweet potato, injury, IAA, and ethylene effects, 43

L

Leaf
Albizzia, rhythmic movement, 202
apple, protein synthesis and inhibition, 151

Arundinella hirta, variation of anatomy, 397
barley and wheat, O_2 effect on stomata, 601
bean
calcium in abscission zone, 683
interconversion of protochlorophyllide, 590
peroxidase activity in abscission zone, 263
CO_2 metabolism in epidermal tissue, 448
corn, plastids and lipids, 240
cotton, age of and ethylene-induced abscission, 667
deferral of senescence with calcium, 236
higher plant, $^{14}CO_2$ dark release, 288
optical parameters, 57
pea, amino acid uptake, 633
soybean, greening and 4-hydroxycinnamic acid hydroxylase activity, 453
spinach
CO_2 fixation under water stress, 28
fatty acid synthesis, 156
zinc, carbonic anhydrase, and photosynthesis, 229
sugar beet, solute levels and phloem transport, 585
tobacco
chlorophyll and chlorogenic acid content, 422
photosynthetic efficiency, 440
water content and hormone effects on RNase activity, 510
Lettuce
metabolic inhibitors and germination, 142
protein synthesis in dormant seeds, 604
vanadium and growth, 183
Leucine incorporation into apple leaf protein, 151
Light, red or far red, photosynthetic efficiency of tobacco leaves, 440
Lilium longiflorum, nutritional role of pistil exudate, 87
Lipids, in rye seedlings during vernalization, 268

M

Maize. *See* Corn
Mercuric chloride inhibition of photophosphorylation, 680
3-Methyleneoxindole, inactivity as mediator of auxin action on cell elongation, 186
Mevalonic acid, terpene biosynthesis in iris, 416
Mitochondria
apple, phase transition, 390
bean, binding of Sr^{2+} to, 459
corn
functioning of adenine nucleotide transporter in arsenate uncoupling of, 431
inhibition of postoxidative calcium release by inorganic phosphate, 403
pea cotyledon, structural development, 575
Monotropa uniflora, development of generative cell wall, 498
Monuron absorption by barley roots, 638
Munch's pressure-flow hypothesis, 531
Myoinositol, cell wall polysaccharide in corn, 646

N

Naphthenic acid, growth stimulation, 162
Nicotinamide adenine dinucleotide phosphate transfer from chloroplasts, 674
Nitrate
effects of *Helminthosporium carbonum* toxin on uptake and reduction in corn, 513
uptake in *Penicillium*, 362
Nitrate reductase
corn root enzyme inactivating, 197
in corn seedling, 191
respiration and induction of, 137
Nucleotide phosphodiesterase, cyclic, activity in barley seeds, 278

O

Oat
phytochrome destruction, 309
plasma membrane-bound ATPase of roots, 6
regulation of invertase levels, 221
turgor-dependent changes in cell walls, 248
wild, early actions of GA in seed, 174
Ochromonas, turnover of galactoglycerol and osmotic balance, 613
Octanoate, isocitrate lyase activity during germination, 549
Oleate, isocitrate lyase activity during germination, 549
Opuntia basilaris, drought adaptation, 539
Osmotic balance in *Ochromonas*, 613
Oxygen, effect on stomata, 601
Oxygen evolution, bicarbonate ion in, 119

P

Pea
amino acid uptake by leaf, 633
aminotransferase, 63
calcium-stimulated degradation, 655
cotyledon mitochondrial development, 575
cycloheximide and ethylene production in roots, 171
filipin, cholesterol, and K^+ movement in stem cells, 93
polyribosomes, 339
stem elongation, 76
Peach, polygalacturonases, from 252
Pear
initiation of ripening with antiauxin, 380
polyphenol oxidases from, 501
Pedigree selection in tobacco, 33
Pelargonium crispum, biosynthesis of (+)-tartaric acid, 651
Penicillium chrysogenum, regulation of nitrate uptake by ammonium ion, 362
Peroxidase
activity in abscission zone of bean leaves, 263
in germinating rice seed, 274
Peroxidase isoenzymes, incorporation of carbohydrate residues into, in horseradish roots, 462
Petiole, bean, anatomy changes, 554
Phloem
mathematical model of translocation, 531
transport in sugar beet, 585
Phosphate, inorganic, inhibition of postoxidative calcium release in corn mitochondria, 403
Phosphoenolpyruvate carboxykinase in Crassulacean acid metabolism plants, 357
6-Phosphogluconate, activation and inhibition of ribulose 1,5-diphosphate carboxylase, 373
Phosphoglycolate formation in photosynthesizing *Chlorella*, 407
Phospholipid
control of labeling, 208
metabolism in castor bean endosperm, 50
Photophosphorylation
energy-coupling sites of, 595
inhibition in spinach chloroplasts by mercuric chloride, 680
Photosynthesis
acquisition of competence for by maize plastids, 491
bicarbonate in oxygen evolution, 119
efficiency of, in tobacco leaves, 440
influence of translocation on efficiency of, in bean, 412
in marine alga, 283
in spinach leaves, 229
pedigree selection for in tobacco, 33
respiration and nitrate reductase induction, 137
sequence of formation of phosphoglycolate and glycolate in *Chlorella*, 407
Phytochrome
de novo synthesis in pumpkin hooks, 124
destruction, 309
properties of, and molecular environment, 327
transformation and action in dock seeds during secondary dormancy, 475
turnover in pumpkin cotyledons, 128
Pistil, nutritional role of exudate, 87
Plastids
corn, acquisition of photosynthetic competence, 491
in green corn leaves, 240
Pollen, *Camellia sasanqua*, acceleration of growth by soaking in organic solvent, 508
Polygalacturonase from peach, 252
Polyphenol oxidase from pear, 501
Polyribosomes
auxin-enhanced formation, 608
calcium-stimulated degradation, 655
pea, 339
synthesis in dormant seeds, 604
Polysaccharide, corn cell wall, 646
Potassium ion, effects of filipin and cholesterol on movement of, in pea stem cells, 93
Potato, sweet, isoperoxidases, and injury, IAA, and ethylene effects, 43
Proline uptake and utilization by *Chlorella*, 561
Protease formation in bean, 671
Protein
breakdown in bean, 671
synthesis and inhibition in apple leaf, 151
synthesis in dormant seeds, 604
synthesis in phytochrome destruction, 309
Protochlorophyllide, interconversion, 590
Protoplasts, mesophyll, purification from C_3, C_4, and Crassulacean acid metabolism plants, 484
Pumpkin
de novo phytochrome synthesis, 124
phytochrome turnover in cotyledons, 128
Purslane, ethylene and response to dicamba, 466
Pyruvate kinase in higher plants, 312

R

Respiration
of *rin* tomato, 38
nitrate reductase activity, 137
Ribonuclease, leaf water content and hormone effects on activity, 510
Ribonucleic acid
chromatin-directed synthesis, 368
leucyl transfer, degradation 292
Ribulose 1,5-diphosphate carboxylase, activation and inhibition of by 6-phosphogluconate, 373
Rice, enzymes in germinating seed, 274
Ripening
initiation in pear with antiauxin, 380
of tomato, effect of water, 132
Root
barley, absorption of 2,4-D and Monuron, 638
chamber for applying pressure to, in intact plants, 472
corn
ATP-sulfurylase, 580
effects of toxin on solute absorption, 518
electron density of tonoplast membranes, 298
nitrate reductase-inactivating enzyme, 197
horseradish, incorporation of carbohydrate residues into peroxidase isoenzymes, 462
ion transport into and through xylem, 346
oat, plasma membrane-bound ATPase, 6
pea, cycloheximide and ethylene production, 171
sweet potato, isoperoxidases, 43
Rye, lipids in seedlings during vernalization, 268

S

Seed
application of chemicals in organic solvents, 79
barley, cyclic nucleotide phosphodiesterase activity, 278
cyanide promotion of germination, 23
lettuce
metabolic inhibitors and germination, 142
protein synthesis in dormant, 604
Pinus pinea, isocitrate lyase activity during germination, 549
rice, enzymes during germination, 274
wild oat, early actions of GA, 174
Seedling
corn, nitrate reductase and glutamate dehydrogenase, 191
cotton, 2-^{14}C-abscisic acid in, 443
cucumber, mineral nutrient requirements, 332
rye, lipids during vernalization, 268
Senescence, leaf, deferral with calcium, 236
Sirenin
activity and uptake, 527
bioassay for, 524
Sorghum
climatic stress, 180
4-hydroxycinnamic acid hydroxylase activity during leaf greening, 453
Soybean
arginine biosynthesis in cells, 68
auxin-enhanced polyribosome formation, 608
stress and fluoride injury, 542
T-2 toxin and hypocotyl elongation, 663
translocation of iron from cotyledons, 393
Sperm, *Allomyces*, activity and uptake of sirenin, 527
Spinach
CO_2 fixation under water stress, 28
fatty acid synthesis by chloroplasts, 156
inhibition of photophosphorylation, 680
zinc, carbonic anhydrase, and photosynthesis in leaves, 229
Squash, sucrose translocation, 688
Stem
bean, anatomy changes, 554
cotton, temperature and water potential flux, 565
oat, regulation of invertase levels, 221
pea
elongation, 76
filipin, cholesterol, and K^+ movement, 93
tobacco, flower formation in segments of, 215
Sterols
inhibition of synthesis, 246
temperature effects on biosynthesis in wheat, 324
Stomata, induction of closure by *Helminthosporium maydis* pathotoxin, 569
Stress
climatic, in sorghum, 180
moisture, heat, and light, influence on fluoride injury, 542
water
adaptation in *Opuntia basilaris*, 539
ammonium-induced, in tomato, 677
CO_2 fixation, 28
^{14}C translocation in corn, 436
Strontium binding to bean mitochondria, 459
Succinate dehydrogenase, regulation in higher plants, 616, 622
Sucrose
regulation of invertase levels, 221
translocation by squash, 688
Synthetase, degradation of leucyl-tRNA, 292

T

(+)-Tartaric acid biosynthesis, 651
Temperature
effects on wheat sterols, 324
phase transition in apple mitochondria, 390
rhythmic leaflet movement, 202
water potential flux, 565
Terpene biosynthesis in iris, 416
Tobacco
chlorophyll and chlorogenic acid content in leaves, 422
effect of T-2 toxin on callus, 660
flower formation on stem segments, 215
isoperoxidases, and injury, IAA, and ethylene effects, 43
pedigree selection for photosynthesis, 33
photosynthetic efficiency of leaves, 440
Tomato
ammonium-induced water stress, 677
ethylene and respiration in *rin* mutant, 38
ethylene-requiring mutant, 385
vanadium and growth, 183
water and ripening, 132
Tonoplast, corn, electron density, 298
Toxin, T-2
hypocotyl elongation, 663
tobacco callus, 660
Translocation
^{14}C, effects of moisture deficits on, in corn, 436
influence on photosynthetic efficiency of bean, 412
mathematical model, 531
Triparanol inhibition of algal sterol synthesis, 246
Turgor, cell wall changes dependent on, 248

V

Vanadium, plant nutrition, 183
Vernalization, lipids in rye seedlings during, 268
Vivipary, physiology of in corn, 350

W

Water, tomato ripening, 132
Wheat
O_2 effect on stomata, 601
temperature effects on sterols, 324

X

Xylem, ion transport into and through, 346

Z

Zinc deficiency in spinach leaves, 229
